

## Accommodation

The campsite is a lovely field less than 10 km from Narbonne on the Mediterranean Sea.

Please remember:

Bring your own tents, sleeping bags etc.  
The drought and heat in the region are a cause of concern, as the small trees only provide little shade and thus the risk of wildfire is significant.

There will be a daily fee for food, water and other expenses for the attendees of the summer camp. If you are in a difficult situation financially, you can ask us for a reduced fee.

If you're travelling from European countries, we invite you to NOT travel by plane!

More comfortable accommodations:  
please contact the tourist information in Narbonne  
(<http://www.narbonne-tourisme.com>)

If you are interested in the camp or in supporting it, please send email to:

[camp2018@nuclear-heritage.net](mailto:camp2018@nuclear-heritage.net)

Please send registration emails with the number of attendees and planned dates to:

[camp-registration@nuclear-heritage.net](mailto:camp-registration@nuclear-heritage.net)

If you have no email:

Adress for postal consultation

Hervé Loquais  
29 rue Victor Hugo  
F-11000 Carcassonne

## International Anti-nuclear Summercamp near Narbonne, France

August 6 - 12  
2018

Sharing knowledge and experience  
International networking  
Day of action  
Preparing projects

for  
A Nuclear-Free World

We invite you to share your knowledge, experiences and a warm feeling of resistance.

Everyone is welcome to offer workshops or presentations on nuclear topics. We hope many participants will talk about the anti-nuclear struggles or about the nuclear policy in their regions.

Our group is made up of independent anti-nuclear activists from around the world, and our goal is to organize a gathering for international networking and the sharing of knowledge and experiences related to anti-nuclear topics.

Within the program there will be time to share experiences and knowledge, and to prepare projects or campaigns, as well as informal meet & greets, artistic & cultural exchanges, siestas and little feasts.

### Main topics

1. The uranium conversion facility of the company Orano in Narbonne-Malvési. During the camp there will be at least one action day against the nuclear industries in Narbonne respectively close to Narbonne.
2. Safety issues associated with the transport of uranium and its by-products across the nuclear fuel chain including radioactive waste.

Our camp will coincide with the anniversaries of the atomic bomb dropping on Hiroshima and Nagasaki on August 6th and 9th, respectively. Thus, we wish to take this opportunity to remember the high death toll of the atomic bomb, and to stress the dangers of nuclear war.

### About Orano (formerly Areva) in Narbonne-Malvési:

The uranium conversion facility Narbonne-Malvési (3 km distance to downtown Narbonne) is supposed to process 21,000 tons every year to uranium tetrafluoride (UF<sub>4</sub>) in the next years. Also, Orano wants to make money with the vaporizing of liquid radioactive waste into the atmosphere in a so called "clean" process. And Orano wants to sell this new process to other companies.

Orano for the next 40 years or more has the permission to emit radioactive gases from more than 350,000 m<sup>3</sup> liquid radioactive waste into the atmosphere. The health risks for flora, fauna and mankind are serious and dangerous.
